

ASAD RAFEEQ

Software Engineer

ar2366296@gmail.com | 0303-3533463 | [linkedin.com/in/asad-rafeeq-b95930268](https://www.linkedin.com/in/asad-rafeeq-b95930268) | Liaquatpur, Rahim Yar Khan

EDUCATION

Capital University of Science and Technology (CUST) <i>BS Software Engineering</i>	Islamabad 2022 – 2026
Punjab Group of Colleges <i>FSc Pre-Engineering</i>	Liaquatpur 2019 – 2021
Govt. Higher Secondary School <i>Matriculation</i>	Muraad Pur 2017 – 2019

SKILLS

Data Analysis & BI: Power BI, DAX, Data Visualization, Data Cleaning, Statistical Analysis
Programming: Python, SQL, MySQL
Data Analysis & Excel: DAX, Microsoft Excel (Advanced), Power Query, Pivot Tables, XLOOKUP, INDEX-MATCH, Data Visualization
Libraries & Tools: Pandas, NumPy, Matplotlib, Git, GitHub
Other: Machine Learning, MS Office Suite

WORK EXPERIENCE

Laravel Developer Intern <i>Goftech Technologies</i>	2025
- Designed and managed relational databases and performed structured data modeling - Developed and maintained RESTful APIs enabling efficient data exchange between systems - Assisted in testing, debugging, and maintaining core company systems with data integrity focus	
Cashier – Fertilizer Shop	Jun 2021 – Feb 2022
- Maintained precise financial records and performed daily reconciliation of cash transactions - Managed billing, invoicing, and data entry operations with accuracy - Maintained updated sales and inventory records to support business decision-making	

PROJECTS

HR Analytics Dashboard <i>Power BI, DAX</i> GitHub	
- Built an interactive dashboard analyzing employee attrition, overtime impact, and workforce trends using the IBM HR Analytics dataset - Implemented custom DAX measures for KPIs including attrition rate, average salary, and average employee age - Uncovered key insights: overtime employees showed higher attrition, younger employees had higher turnover, and Sales had the highest departmental attrition	
Railway Reservation System Analytics Dashboard <i>Power BI, SQL, MySQL, DAX</i> GitHub	
- Built an end-to-end BI dashboard transforming raw reservation data into insights on passenger bookings, train performance, revenue generation, and payment trends - Developed KPI metrics tracking total bookings, passengers, revenue, and average ticket price using custom DAX measures - Analyzed booking confirmation and cancellation trends, payment method preferences, and passenger demographics across routes - Implemented interactive slicers for train, booking status, payment method, and demographic filters for dynamic data exploration	
Superstore Sales Performance Dashboard <i>Power BI</i> GitHub	
Developed a business intelligence dashboard covering sales KPIs, regional performance, and customer segmentation using the Superstore dataset	

- Built KPI measures for total sales, profit, orders, and profit margin, identifying that the West region led in sales while some categories showed high revenue but low margins

SQL Practice Solutions | *MySQL, SQL* | [GitHub](#)

- Solved 12+ SQL interview and database problems covering joins, subqueries, aggregate functions, window functions, self joins, and data manipulation.
- Implemented optimized SQL queries using MySQL while applying best practices for query design and relational database operations.
- Documented each solution with the problem statement, SQL query, and expected output to demonstrate structured problem-solving and SQL proficiency.

HR Analytics Dashboard (Excel) | *Microsoft Excel 2019, Power Query, Pivot Tables, XLOOKUP, INDEX-MATCH* | [GitHub](#)

- Developed an interactive HR Analytics dashboard in Microsoft Excel using the IBM HR Analytics dataset to analyze employee attrition, workforce distribution, salary trends, and overtime impact.
- Performed data cleaning and transformation with Power Query, created Pivot Tables and Pivot Charts, and implemented XLOOKUP, INDEX-MATCH, and advanced Excel functions to automate analysis.
- Designed KPI cards and interactive slicers to enable dynamic filtering by department, gender, job role, education field, and overtime, providing actionable HR insights.

Smart Vertical Gardening (FYP) | *IoT, Flutter* [GitHub](#)

- Developed an IoT-based smart gardening system for real-time plant monitoring and environmental data visualization
- Integrated hardware sensors and automated irrigation with a Flutter mobile interface for live data tracking

Clothing Store Website | *React.js* | [Live Demo](#) | [GitHub](#)

- Built a fully responsive e-commerce website using React.js featuring a modern user interface, product browsing, shopping cart functionality, and responsive layouts.
- Implemented reusable React components, state management, and dynamic product rendering to deliver a seamless user experience across desktop and mobile devices.

Weather Forecast Web App | *React.js, REST API* | [Live Demo](#) | [GitHub](#)

- Developed a real-time weather forecasting application using React.js and third-party weather APIs to display current weather conditions for any city.
- Displayed key weather metrics including temperature, humidity, wind speed, and weather conditions with a clean, responsive user interface and dynamic API integration.

VOLUNTEER EXPERIENCE

Volunteer Intern

2 Weeks

Al-Khidmat Foundation

- Participated in community welfare initiatives and assisted in organizing social support programs
- Collaborated with field teams to deliver effective outreach during community events

ACHIEVEMENTS & CERTIFICATIONS

2nd Runner-Up – RCCI Business Idea Competition 2025

Basics of SQL: Aggregate Functions Joins – UniAthena

Generative AI Application Developer Certificate – PAKANGELS

Python for Beginners – Great Learning

Excel for Beginners – Great Learning

Hackathon Participation Certificate

Internship Completion Certificate – Goftech Technologies
